Ref.: Project Roca Llisa

PROJECT ROCA LLISA

This development is not only exclusive in that it borders and overlooks the Roca Llisa golf course, it also boasts controlled access and outstanding security, and provides all the premium services of a high-end gated community.

Each property sits on a landscaped plot of at least 1,500 m² and enjoys an elevated position to guarantee stunning views of the pristine greenery of the golf course and the pine forests beyond. It guarantees privacy from neighboring residences and offering premium security systems throughout each property. The project incorporate energy efficient installations such as aero-thermal systems for high performance year-round interior climate and air quality control whilst respecting our external atmosphere. The villas have been designed for optimal use of natural resources in water usage including rainwater collection, cisterns and filters.
